## Tugas 1 PowerBI

### Tampilan PowerBI setelah di Install

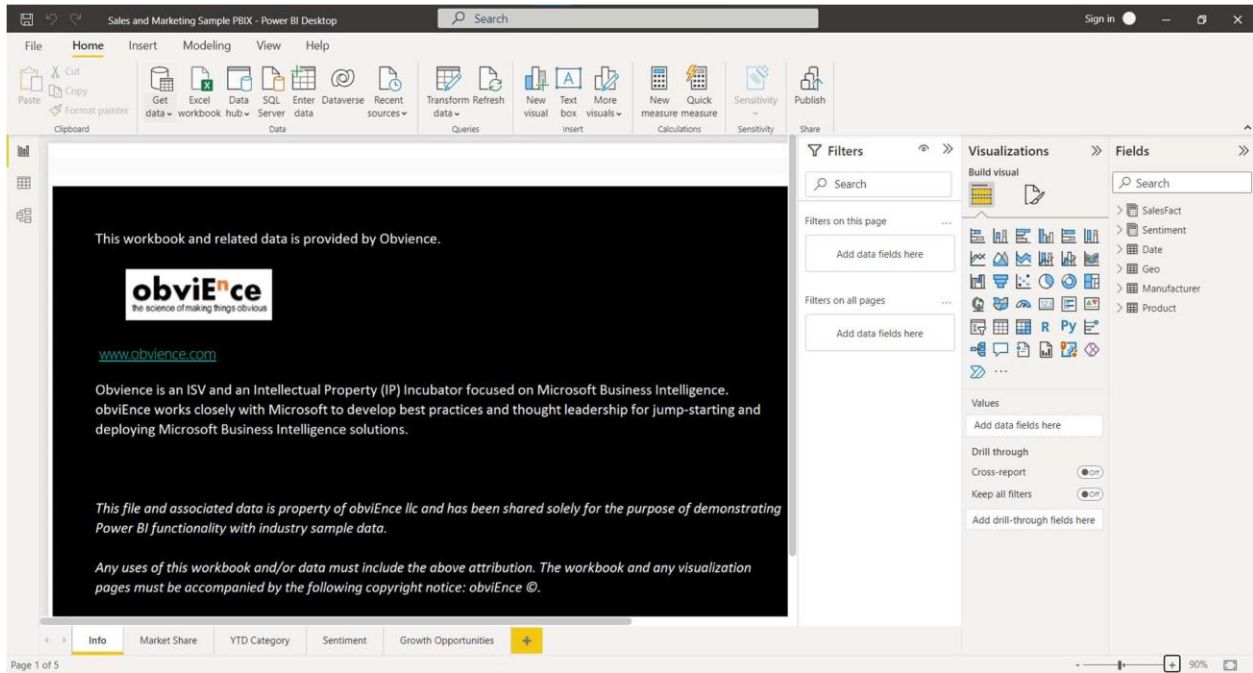

# 1. BUILDING BLOCKS OF PowerBI

## A.VISUALIZATION

- Open Report file “Sales and Marketing Sample PBIX”

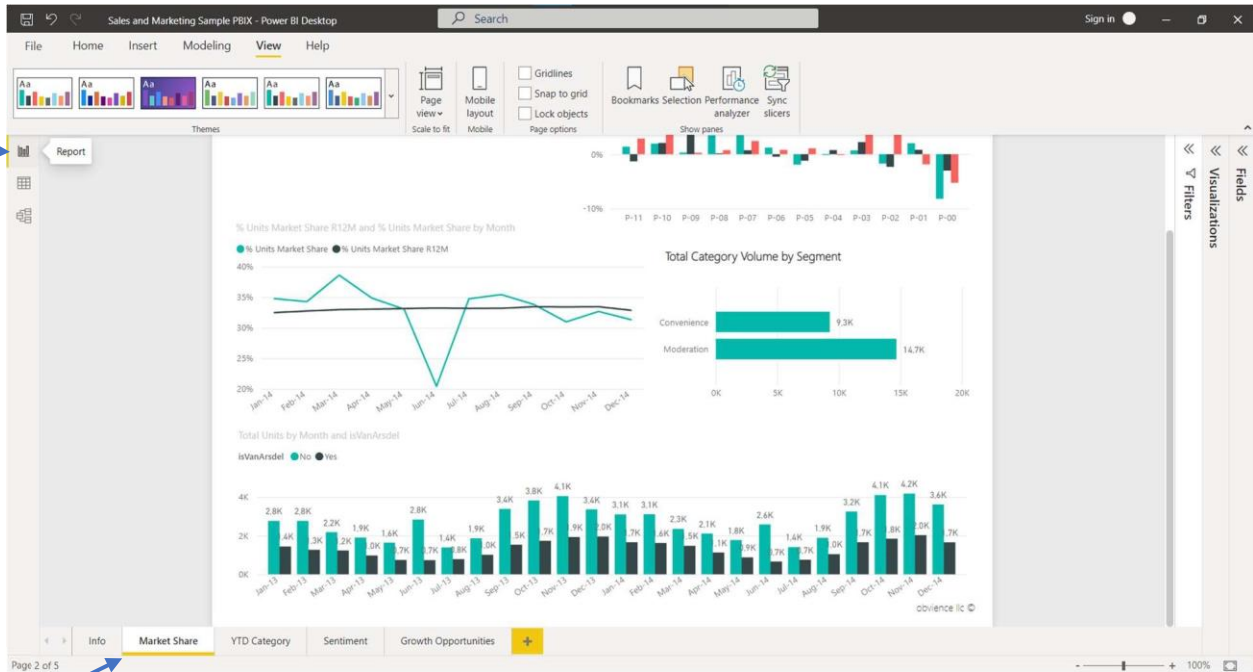

Dengan cara **File > Open Report > Browse reports > This PC** , lalu pilih filenya.

Kemudian akan beralih ke tampilan seperti berikut

- Pilih **Report** View pada bagian kiri interface PowerBI , dan pilih “**Market Share**” pada tab Report di bagian bawah. Kemudian Minimize “**Filters**” , “**Visualizations**” dan “**Fields**” agar bisa melihat data pada desktop secara fullscreen

1

## 2 B. DATASETS

Pilih “Data” pada bagian kiri Interface powerBI , dan pada panel “Fields” di sebelah kanan, pilih tabel “Product” untuk menampilkan data pada tabel tersebut.

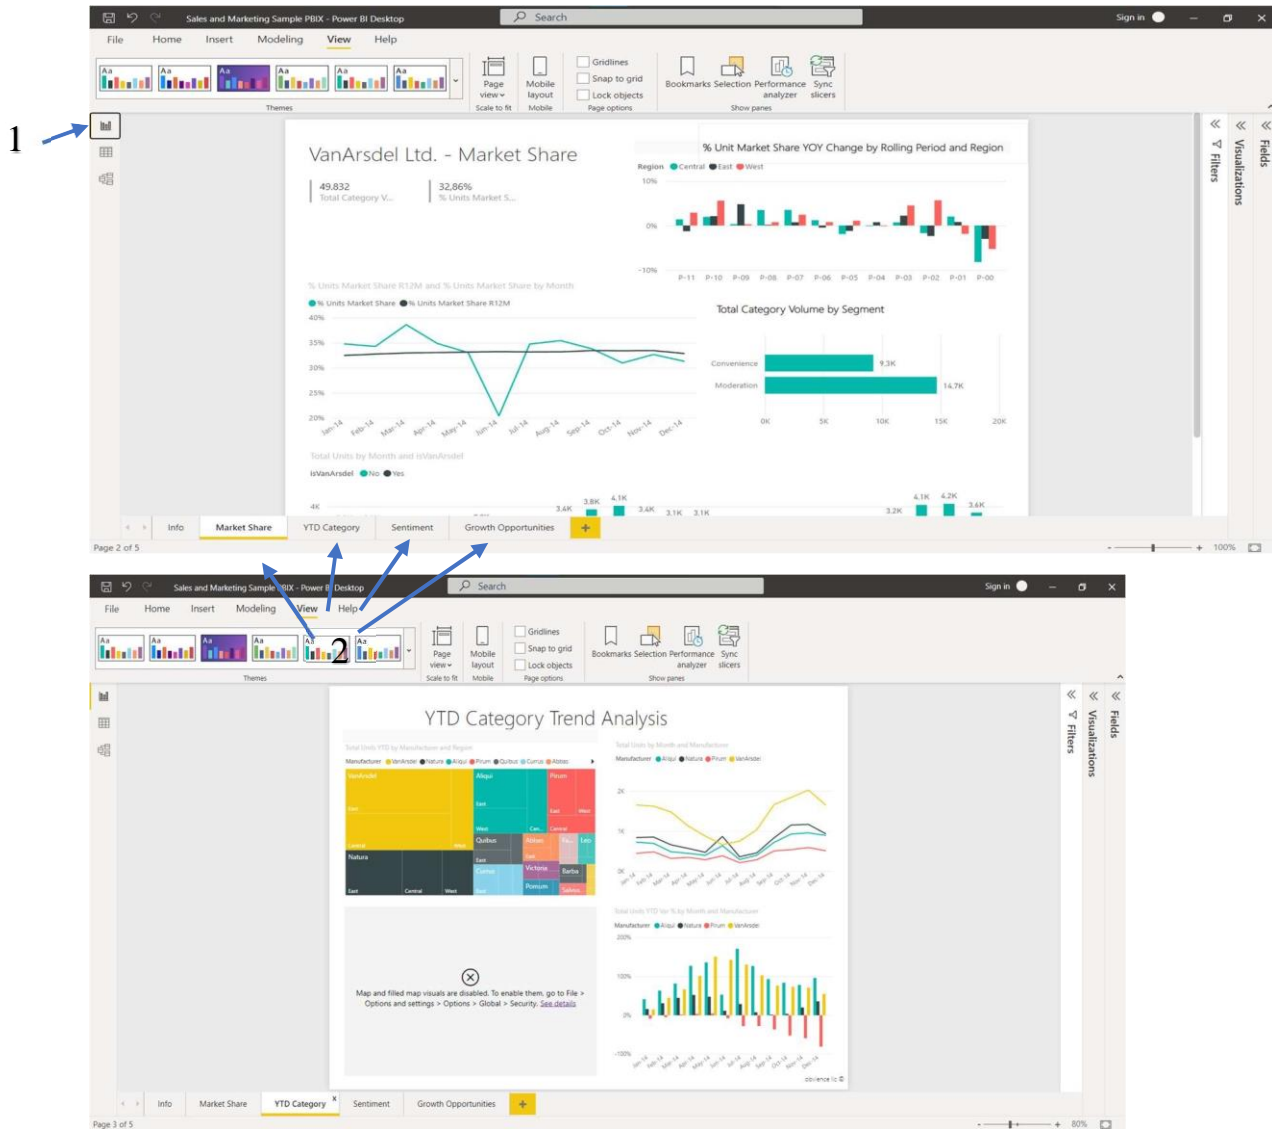

The screenshot shows the Power BI Desktop interface with a table view of the 'Product' dataset. The table has columns: Manufacturer, Category, Segment, Product, ProductID, isVanArsdel, isCompeteHide, ManufacturerID, and isCompete. The left-hand navigation pane shows the 'Data' icon selected. The right-hand pane shows the 'Fields' pane with 'Visualizations' and 'Fields' tabs. The 'Product' table is selected in the 'Fields' pane.

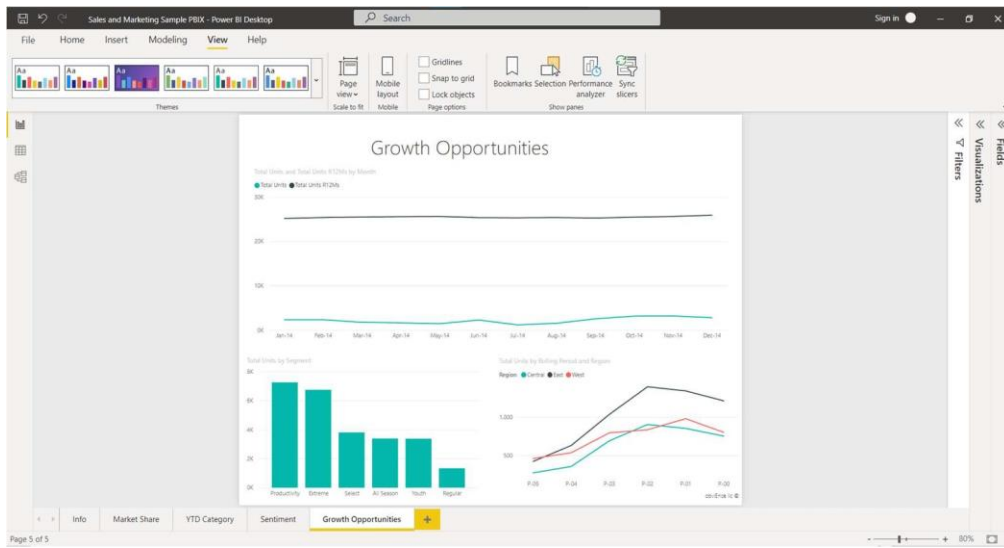

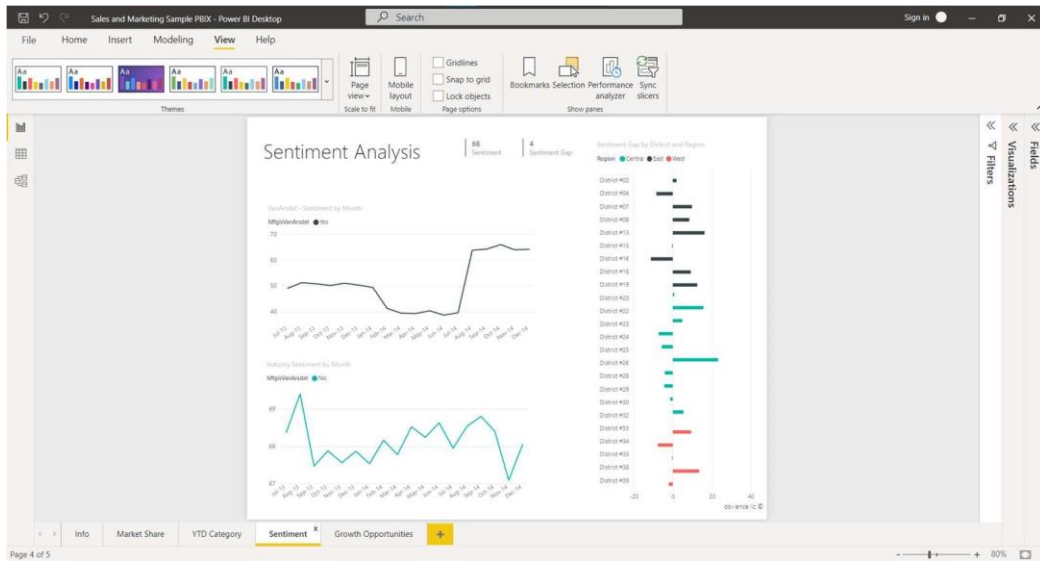

Manufacturer	Category	Segment	Product	ProductID	isVanArsdel	isCompeteHide	ManufacturerID	isCompete
VanArsdel	Urban	Convenience	Maximus UC-01	536	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-02	537	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-03	538	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-04	539	Yes	N	7	No

VanArsdel	Urban	Convenience	Maximus UC-18	553	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-19	554	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-20	555	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-21	556	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-22	557	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-23	558	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-24	559	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-25	560	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-26	561	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-27	562	Yes	N	7	No
VanArsdel	Urban	Convenience	Maximus UC-28	563	Yes	N	7	No

Table: Product (2,412 rows)

## C. REPORTS

Pilih “**Reports**” pada bagian kiri Interface powerBI , dan lakukan eksplorasi pada “content” yang tersedia di masing – masing report page yang ada.

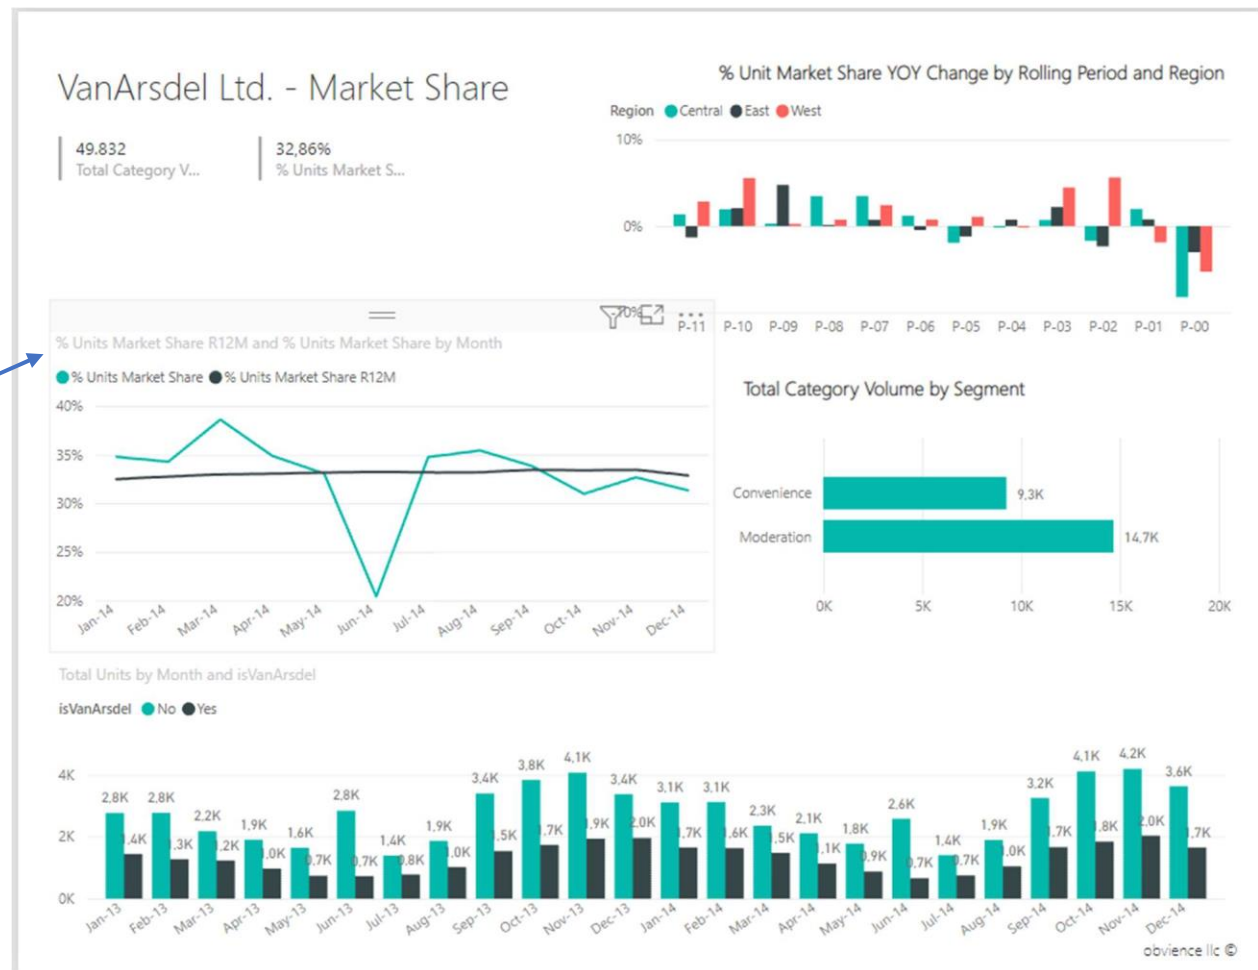

Pada setiap “**Report**” terdapat “**Dashboard**” dan “**Tiles**”, misalnya pada “**Market Share**” sebagai contoh, keseluruhan page Market Share disebut sebagai “**Dashboard**”, dan

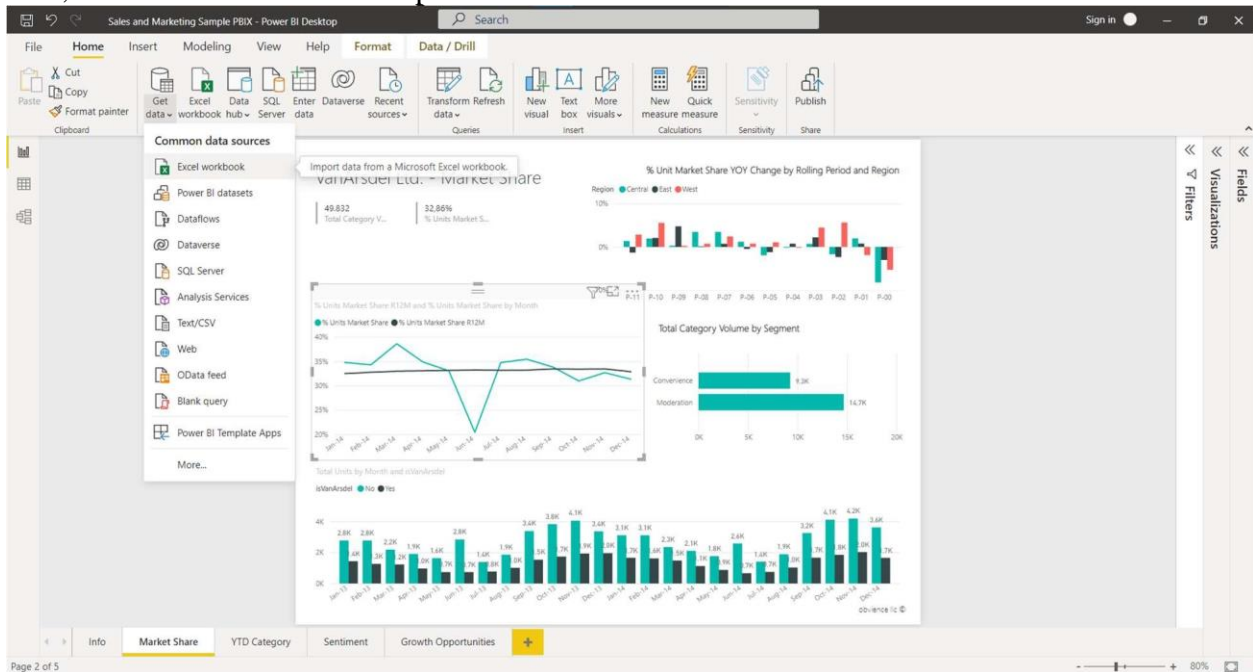

“Units Market Share R12M and % Units Market Share by Month” adalah contoh “**Tile**”

Tile

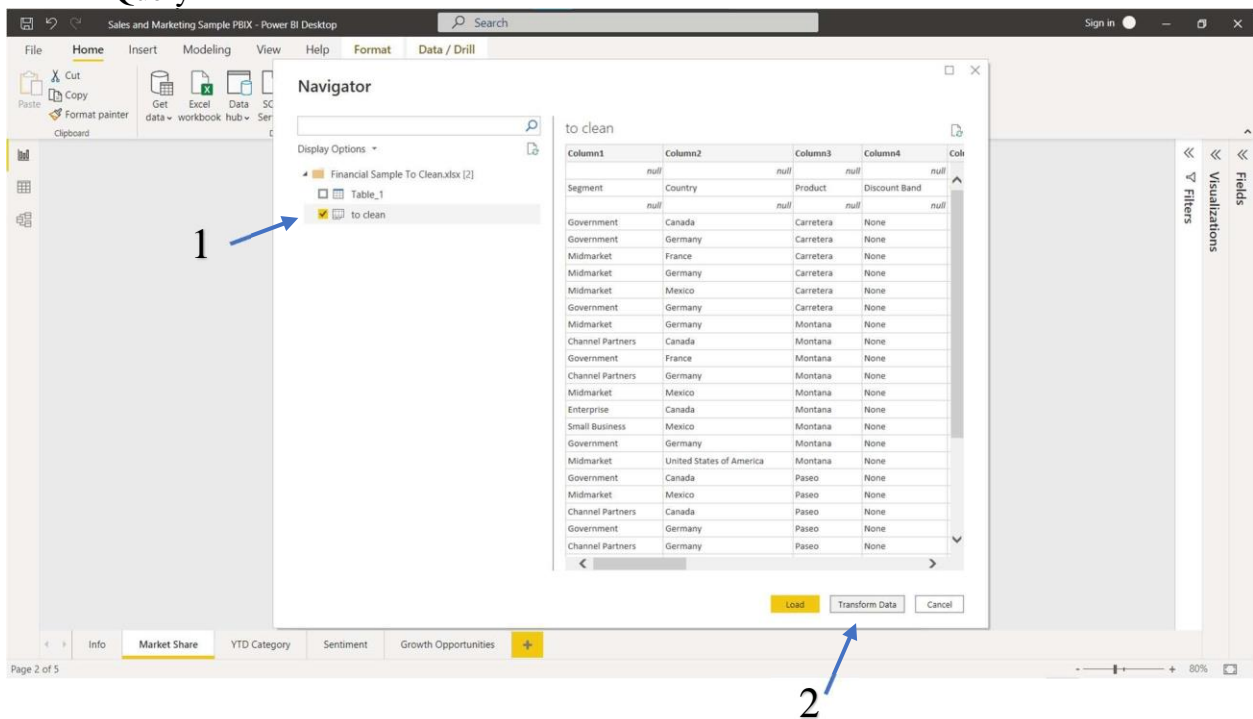

## 2. Load, Clean, and Transform Data in Power BI

Pada Tab “Home”, pilih “Get Data” > “Excel workbook”, kemudian pilih Home Folder Support files, dan Select “Financial Sample To Clean.xlsx”

Kemudian centang “to clean kemudian pilih “Transform Data” untuk melakukan load data ke “Power Query Editor”

File yang terlihat disini masih kurang rapi, Maka kita perlu membuat row 2 menjadi Headers.

Disebelah kiri “Column 1” Klik tanda panah dan pilih “Use First Row as Headers” dan ulangi lagi sampai row 2 sebelumnya , menjadi Headers.

The screenshot shows the Power Query Editor interface. The formula bar at the top displays the source query: `= Source([Item="to clean",Kind="Sheet"])[Data]`. The table below has 7 columns labeled Column1 through Column7. A context menu is open over the first column header, with the option "Use First Row as Headers" selected. The table data includes rows with headers like "Product", "Discount Band", "Units Sold", "Manufacturing Price", and "Sale Price".

Column1	Column2	Column3	Column4	Column5	Column6	Column7
		Product	Discount Band	Units Sold	Manufacturing Price	Sale Price
		Carretera	None	1618,5	3	
		Carretera	None	1321	3	
		Carretera	None	2178	3	
		Carretera	None	888	3	
		Carretera	None	2470	3	
		Carretera	None	1513	3	
		Montana	None	921	5	
		Montana	None	2518	5	
		Montana	None	1899	5	
		Montana	None	1545	5	
		Montana	None	2470	5	
		Montana	None	2665,5	5	
		Montana	None	958	5	
		Montana	None	2146	5	
		Montana	None	615	5	
		Paseo	None	292	10	
		Paseo	None	974	10	
		Paseo	None	2518	10	
		Paseo	None	1006	10	
		Paseo	None	367	10	
		Paseo	None	883	10	
		Paseo	None	2472	10	
		Paseo	None	1143	10	
		Paseo	None	1817	10	
		Paseo	None	1513	10	

Kemudian hasilnya seperti ini:

The screenshot shows the Power Query Editor after the transformation. The formula bar now displays: `= Table.TransformColumnTypes(#"Promoted Headers1",{{"Segment", type text}, {"Country", type text}, {"Product", type text}, {"Discount Band", type text}, {"Units Sold", type number}, {"Manufacturing Price", type number}, {"Sale Price", type number}})`. The table has 7 columns: Segment, Country, Product, Discount Band, Units Sold, Manufacturing Price, and Sale Price. The data is organized into rows with headers. A "Query Settings" panel is open on the right, showing the "APPLIED STEPS" list with "Changed Type2" selected.

Segment	Country	Product	Discount Band	Units Sold	Manufacturing Price	Sale Price
		Carretera	None	1618,5	3	
		Carretera	None	1321	3	
		Carretera	None	2178	3	
		Carretera	None	888	3	
		Carretera	None	2470	3	
		Carretera	None	1513	3	
		Montana	None	921	5	
		Montana	None	2518	5	
		Montana	None	1899	5	
		Montana	None	1545	5	
		Montana	None	2470	5	
		Montana	None	2665,5	5	
		Montana	None	958	5	
		Montana	None	2146	5	
		Montana	None	615	5	
		Paseo	None	292	10	
		Paseo	None	974	10	
		Paseo	None	2518	10	
		Paseo	None	1006	10	
		Paseo	None	367	10	
		Paseo	None	883	10	
		Paseo	None	2472	10	
		Paseo	None	1143	10	
		Paseo	None	1817	10	
		Paseo	None	1513	10	
		Velo	None	1493	120	
		Velo	None	1804	120	

Scroll kanan , ke kolom “Month Info” , rename Column name menjadi “Date”

	1 Des 2014
	1 Jan 2014

Pada “Column16” juga, rename Column menjadi “Year”

[illegible][illegible]

Kemudian Remove Top Row, karena datanya “null”

The screenshot shows the Power Query Editor interface. The formula bar contains the expression: `= Table.RenameColumns(#"Changed Type2",{{"Month Info", "Year"}})`. The table has columns: Segment, Country, Product, Discount Band, Units Sold, Manufacturing Price, and Sale Price. The first row has null values for Segment, Country, and Product. The 'Remove Top Rows' menu is open, showing options to remove top rows, bottom rows, alternate rows, duplicates, blank rows, and errors.

	Segment	Country	Product	Discount Band	Units Sold	Manufacturing Price	Sale Price
1							
2	Government	Canada	Carretera	None	1618,5	3	
3	Government	Germany	Carretera	None	1321	3	
4	Midmarket	France	Carretera	None	2178	3	
5	Midmarket	Germany	Carretera	None	888	3	
6	Midmarket	Mexico	Carretera	None	2470	3	
7	Government	Germany	Carretera	None	1513	3	
8	Midmarket	Germany	Montana	None	921	5	
9	Channel Partners	Canada	Montana	None	2518	5	
10	Government	France	Montana	None	1899	5	
11	Channel Partners	Germany	Montana	None	1545	5	
12	Midmarket	Mexico	Montana	None	2470	5	
13	Enterprise	Canada	Montana	None	2665,5	5	
14	Small Business	Mexico	Montana	None	958	5	
15	Government	Germany	Montana	None	2146	5	
16	Midmarket	United States of America	Montana	None	615	5	
17	Government	Canada	Paseo	None	292	10	

Hasilnya

The screenshot shows the result of the transformation. The formula bar now contains: `= Table.Skip(#"Renamed Columns",1)`. The table now starts with row 2, and the first row (row 1) is no longer present. The columns remain the same.

	Segment	Country	Product	Discount Band	Units Sold	Manufacturing Price	Sale Price
1	Government	Canada	Carretera	None	1618,5	3	
2	Government	Germany	Carretera	None	1321	3	
3	Midmarket	France	Carretera	None	2178	3	
4	Midmarket	Germany	Carretera	None	888	3	
5	Midmarket	Mexico	Carretera	None	2470	3	
6	Government	Germany	Carretera	None	1513	3	
7	Midmarket	Germany	Montana	None	921	5	
8	Channel Partners	Canada	Montana	None	2518	5	
9	Government	France	Montana	None	1899	5	
10	Channel Partners	Germany	Montana	None	1545	5	
11	Midmarket	Mexico	Montana	None	2470	5	
12	Enterprise	Canada	Montana	None	2665,5	5	
13	Small Business	Mexico	Montana	None	958	5	
14	Government	Germany	Montana	None	2146	5	
15	Midmarket	United States of America	Montana	None	615	5	
16	Government	Canada	Paseo	None	292	10	
17	Midmarket	Mexico	Paseo	None	974	10	
18	Channel Partners	Canada	Paseo	None	2518	10	
19	Government	Germany	Paseo	None	1006	10	
20	Channel Partners	Germany	Paseo	None	367	10	
21	Government	Mexico	Paseo	None	883	10	
22	Midmarket	Mexico	Paseo	None	2472	10	
23	Government	United States of America	Paseo	None	1143	10	
24	Government	Canada	Paseo	None	1817	10	
25	Government	Germany	Paseo	None	1513	10	
26	Government	Mexico	Velo	None	1493	120	
27	Enterprise	France	Velo	None	1804	120	
28	Channel Partners	Germany	Velo	None	2161	120	

Kemudian pilih “Column17” , pada Home , pilih “Remove Columns”

Maka Column17 sudah tidak ada lagi pada data di Power Query Editor tersebut

Month Name	Year	Column17
January	2014	814028,68
January	2014	814028,68
June	2014	1473753,82

Sekarang dengan cara yang sama seperti sebelumnya Lakukan Remove Columns lagi, tapi sisakan 3 Column yaitu “Segment”, “Country” dan “Sales”.

Table.RemoveColumns(#"Removed Top Rows",{"Column17", "Product", "Discount Band", "Units Sold", "Manufacturing Price", "Sale Price", "Gross

	Segment	Country	Sales
1	Government	Canada	32370
2	Government	Germany	26420
3	Midmarket	France	32670
4	Midmarket	Germany	13320
5	Midmarket	Mexico	37050
6	Government	Germany	529550
7	Midmarket	Germany	13815
8	Channel Partners	Canada	30216
9	Government	France	37980
10	Channel Partners	Germany	18540
11	Midmarket	Mexico	37050
12	Enterprise	Canada	333187,5
13	Small Business	Mexico	287400
14	Government	Germany	15022
15	Midmarket	United States of America	9225
16	Government	Canada	5840
17	Midmarket	Mexico	14610
18	Channel Partners	Canada	30216
19	Government	Germany	352100
20	Channel Partners	Germany	4404
21	Government	Mexico	6181
22	Midmarket	Mexico	37080
23	Government	United States of America	8001
24	Government	Canada	36340
25	Government	Germany	529550
26	Government	Mexico	10451
27	Enterprise	France	225500
28	Channel Partners	Germany	25932

Kemudian pilih “Remove Blank Rows”

ng Sample PBIX - Power Query Editor

1 Add Column View Tools Help

er ta Data source settings Manage Parameters Refresh Preview Properties Advanced Editor Manage Choose Columns Remove Columns Keep Rows Remove Rows Split Column Group By Data Type: Text Use First Row Replace Value

Data Sources Parameters Query Manage Columns Reduce Rows Transform

= Table.SelectRows(#"Removed Errors", each not List.IsEmpty([Sales]))

	Segment	Country	Sales
1	Government	Canada	
2	Government	Germany	
3	Midmarket	France	32670
4	Midmarket	Germany	13320
5	Midmarket	Mexico	37050

Remove Top Rows  
Remove Bottom Rows  
Remove Alternate Rows  
Remove Duplicates  
Remove Blank Rows  
Remove Errors

Berikutnya Pilih Column “Country” , dan Pada tab “Transform” pilih “Pivot Column”

The screenshot shows the Power Query Editor interface. The 'Transform' tab is active, and the 'Pivot Column' button is highlighted with a blue arrow. The data table below shows the following information:

	Segment	Country	Sales
1	Government	Canada	32370
2	Government	Germany	26420
3	Midmarket	France	32670
4	Midmarket	Germany	13320
5	Midmarket	Mexico	37050
6	Government	Germany	529550
7	Midmarket	Germany	13815
8	Channel Partners	Canada	30216
9	Government	France	37980
10	Channel Partners	Germany	18540

Pada tab berikut, Pilih “Sales” sebagai Values Column dan “Sum” sebagai Aggregate Value Function , kemudian OK.

The screenshot shows the 'Pivot Column' dialog box. The 'Values Column' is set to 'Sales' and the 'Aggregate Value Function' is set to 'Sum'. The dialog box also includes a 'Learn more about Pivot Column' link and 'OK' and 'Cancel' buttons.

Kemudian Hasilnya kita dapat melihat Total Sales dari setiap Segment, berdasarkan negara yang merupakan data dari Column “Country”.

✕ ✓ fx		= Table.Pivot(#"Removed Blank Rows", List.Distinct(#"Removed Blank Rows"[Country]), "Country", " Sales", List.Sum)					
	Segment	1.2 Canada	1.2 Germany	1.2 France	1.2 Mexico	1.2 United States of America
